

Resolution 8-21: Reinstating Provincial Agriculture Department Staff

AF understands the ASB Provincial Committee's concerns with the workforce adjustments that occurred in 2020 and early 2021, and the reduction in dedicated extension staff within the department. The Ag-Information Centre has transitioned from being the first point of contact for agriculture information and resources to being the first point of contact for department programs and resources for the agriculture community. AF is working with industry partners to ensure clients are connected with the right information and resources.
